Attorney Docket No. 0470-061191

**AMENDMENT TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims**

Claims 1-15 (Cancelled).

Claim 16 (Currently Amended): A method for the treatment, or reduction of risk or prevention of an immune system-related disorder selected from the group consisting of allergy Type 1, allergy Type 2, allergy Type 3, and allergy Type 4 in a mammal, comprising administering to said mammal a composition comprising a therapeutically effective amount of an acid oligosaccharide and at least two chemically distinct neutral oligosaccharides, wherein:

the acid oligosaccharide has a degree of polymerization between 1 and 250 and is prepared from pectin or alginate and comprises at least one terminal uronic acid unit selected from the group consisting of galacturonic acid, guluronic acid and mannuronic acid; and

the at least two chemically distinct neutral oligosaccharides comprise fructooligosaccharides and a second oligosaccharide selected from the group consisting of transgalactooligosaccharides, galactooligosaccharides and mixtures thereof.

Claims 17-24 (Cancelled).

Claim 25 (Previously Presented): The method according to claim 16, wherein the composition is administered enterally.

Claim 26 (Previously Presented): The method according to claim 16, wherein the composition is administered to a human in the age of 0-1 year.

Claim 27-30 (Cancelled).

Application No. 10/576,834

Paper dated February 18, 2010

In reply to the Office Action of August 19, 2009

Attorney Docket No. 0470-061191

Claim 31 (Previously Presented): The method according to claim 16, wherein the immune system related disorder is allergy Type 1.

Claim 32 (Previously Presented): The method according to claim 16, wherein the immune system related disorder is a Type 1 allergy selected from the group consisting of atopy, asthma, hay fever, eczema, food allergy and drug allergy.

Claim 33 (Previously Presented): The method according to claim 32, wherein the Type 1 allergy is atopy.

Claim 34 (Previously Presented): The method according to claim 32, wherein the Type 1 allergy is eczema.

Claim 35 (Previously Presented): The method according to claim 16, further comprising administering between 0.1 and 100 g of a long-chain polyunsaturated fatty acid per day.

Claim 36 (Previously Presented): The method according to claim 16, wherein the composition further comprises an infant formula comprising between 5 and 60 en% lipid, between 5 and 40 en% protein, between 15 and 90 en% carbohydrate and long chain polyunsaturated fatty acids.

Claim 37 (Previously Presented): The method according to claim 36, wherein the infant formula comprises 7 to 12 energy% protein, 40 to 55 energy% carbohydrates and 35 to 50 energy % fat.

Claim 38 (Previously Presented): The method according to claim 36, wherein the protein is selected from the group consisting of hydrolyzed milk protein, vegetable protein and/or amino acids.

Application No. 10/576,834

Paper dated February 18, 2010

In reply to the Office Action of August 19, 2009

Attorney Docket No. 0470-061191

Claim 39 (Previously Presented): The method according to claim 16, wherein the composition is a liquid food which has an osmolality between 50 and 500 mOsm/kg and/or a caloric density between 0.1 and 2.5 kcal/ml.

Claim 40 (Cancelled).

Claim 41 (Previously Presented): The method according to claim 16, wherein the immune system-related disorder is atopy in an infant.

Claim 42 (Cancelled).
